Objective

I've always been passionate about music and sound. From my earliest years when I listened to my parents' records and the first time I tried a digital audio workstation. Now I'm making my dream come true, by getting a professional bachelor's degree in Media Sonic Communication.

I have worked with a wide range of projects. From music production and studio recording, to dynamic sound design and game audio. I have learned to use methods from the field of communication and combine them with sound design and music production. To know the right terminology and concepts makes the cooperation with the customer so much easier and brings a whole new dimension into the production of sound.

My works include sound design for the Culture Night 2015 in Copenhagen, where I produced sound design for a big light show, in the palm house at the Botanical Garden of Copenhagen. More than 30.000 people attended the event.

Experience

Nærum Skole

2013 – 2014

Bookbinding for Nærum elementary school.

Moment A/S
